JAVASCRIPT, REACT, Git

## Soft Skills

Communication,  
Problem Solving,  
Teamwork,  
Time management,  
Organizational,  
Critical Thinking,

## Summary

I am a frontend developer with a keen interest in building web applications. I am experienced in building websites and landing pages using modern technologies like CSS, SASS, JavaScript and React. I am passionate about building responsive web designs and writing clean and organized code. I am also passionate about personal and professional development. I offer my ability to deliver creative, elegant and efficient solutions to problems and I also pay attention to details when dealing with a project. I always seek to build my skill set to stay updated on latest technologies thereby staying up to date on new and efficient problem solving techniques. While learning React JS framework, I'm open to opportunities to contribute my skills on ambitious projects.

## Experiences

### STUDENT INTERN

Frontend Development , April 2022 - present

- Worked in a team to build websites with HTML, CSS and JavaScript.
- Developed design into actual website
- worked in the developers team on a startup project to help HR managers ease their stress in getting suitable employees. This is being carried out alongside people from other fields ranging from project managers, UI UX designers, backend developers, etc.

### FREELANCER

- Converted figma designs into actual websites with HTML, CSS and JavaScript.
- Developed responsive front-end websites.
- Implemented browser compatibility across chrome, firefox, safari and other common browser interfaces
- Embedded media into sites using reliable streamlined protocols and technologies.

## Certification

### FRONTEND DEVELOPMENT

Issued May, 2022
